SONIA REYES

<h2>FRONT END DEVELOPER</h2>

ABOUT ME

Front-end Developer and Master in Business Administration.
I create dynamic, creative, and accessible web applications.

My previous experience in startups has taught me that every client and every user has a story to tell, and I want to hear them. **On a team, I tend to help bring out a broad vision, focusing not only on the technical but also on the client and their usability and value proposition requirements.** That's why I love to learn new practices and technologies that allow me to achieve this. I seek to contribute to creating technological solutions that transform experiences, lives, and businesses.

EXPERIENCE

Front-end Developer | Laboratoria

March 2022 - August 2022.

Some of my projects:

Banco ITAÚ - Transactions Dashboard
Dashboard MVP to visualize and manage the different operations of the Wholesale Banking segment on the bank's digital platform. Developed in just 4 days during: Hackathon Talent Fest Laboratoria.
Javascript | React | HTML | Tailwind | Material UI | ApexCharts | Firebase

Lab Notes
Web-based note-taking application that aims to assist individuals and professionals in capturing their ideas into notes. Similar to Keep App by Google.
Javascript | Node.js | AWS | Figma

Queen's Road Cafe
Tablet-optimized application for restaurants to handle order management operations in real-time.
Javascript | React | HTML | Sass | Axios | API Rest | Figma

Md-Links
Npm library to extract and validate links from markdown (.md) files.
Javascript | Node.js | CLI | Axios | Cheerio

Junktube - Social Network
Web application for film recommendation, where users can interact with each other, and create, edit and delete their publications.
Javascript Vanilla | CSS | HTML | Firebase | Figma

Card Validation
Web application that provides validation utilities for credit card data inputs.
Javascript Vanilla | CSS | HTML | Firebase | Figma

Project Analyst | Bimetrix

2019 - August 2022.

My Objective: To handle proposals for clients in the construction industry, assessing how our platform (SaaS), based on data analytics, could support the better management of their projects on the construction site.

Achievements:
- I prospected funding avenues, achieving the successful application and affiliation to **Startup Chile**.
- My understanding of the business allowed me to **suggest** to the development team **recalibrations** of our product focused on the **user experience.**
